State	Finished
Completed on	Friday, 14 August 2026, 8:54 AM
Time taken	20 mins 7 secs
Marks	1.00/1.00
Grade	**10.00** out of 10.00 (**100**%)

Question 1 | Correct Mark 1.00 out of 1.00

Convert the following algorithm into a program and find its time complexity using counter method.

```
Factor(num) {
{
   for (i = 1; i <= num;++i)
   {
    if (num % i== 0)
       {
         printf("%d ", i);
       }
    }
 }
```

Note: No need of counter increment for declarations and scanf() and counter variable printf() statement.

Input:

A positive Integer n

Output:

Print the value of the counter variable

Answer:

```c
#include <stdio.h>

void Factor(int num) {
    int i;
    int count=0;

    for (i = 1; i <= num; ++i) {
        count++;

        if (num % i == 0) {
            count++;

        }
         count++;
    }

    count++;
    printf("%d", count);
}

int main() {
    int n;
    scanf("%d", &n);
    Factor(n);
    return 0;
}
```

	Input	Expected	Got	
✔	12	31	31	✔
✔	25	54	54	✔
✔	4	12	12	✔

Passed all tests! ✔

Correct

Marks for this submission: 1.00/1.00.
